CDSE

Guber Transportation

Handout

Watch the short *Guber Transportation* video clip.

- Notice anything you see that is an actual or potential error that could lead to or result in a security incident. (You may want to watch the video several times to see some of the more subtle mistakes.)
- Use the bottom left hand portion of this Job Aid to take notes on what you have seen.
- Once you have identified some errors, complete the bottom right hand portion to note how those errors could have been prevented.

For additional resources go to http://www.cdse.edu/toolkits/sap/index.php

How many errors can you find?
