CDSE

The Email

Handout

Watch the short *The Email* video clip.

Notice anything you see that is an actual or potential error that could lead to or result in a security incident. (You may want to watch the video several times to see some of the more subtle mistakes.)
Use the bottom left hand portion of this Job Aid to take notes on what you have seen.
Once you have identified some errors, complete the bottom right hand portion to note how those errors could have been prevented.

For additional resources, go to http://www.cdse.edu/toolkits/sap/index.php

How many errors can you find?
