

Bad Start

Handout

Watch the short *Bad Start* video clip.

- Notice anything you see that is an actual or potential error that could lead to or result in a security incident. (You may want to watch the video several times to see some of the more subtle mistakes.)
- Use the bottom left-hand portion of this Job Aid to take notes on what you have seen.
- Once you have identified some errors, complete the bottom right-hand portion to note how those errors could have been prevented.
