

WHO IS REALLY SPONSORING YOUR INNOVATION?

Foreign Intelligence Entities (FIE) and their proxies hide behind legitimate-looking funding and collaborative offers to extract national security research and capabilities...■

ARE YOU A TARGET?

The defense research community is a focus of FIE infiltration:

Academic Partners

University professors, graduate researchers, and staff at DOW-affiliated research centers or defense research grantees.

DOW & Government R&D Personnel

Scientists, engineers, and program managers at DOW labs; agencies; and innovation hubs.

Institutes & Advisory Bodies

Subject-matter experts at think tanks and scientific journals providing peer reviews or strategic analysis.

Defense Industry Innovators

R&D engineers and scientists at cleared defense contractors developing future capabilities.

WHAT CAN YOU DO?

Carefully vet unsolicited interactions:

Look Behind the Offer

Don't take funding, partnerships, or speaking invitations at face value. Always verify the true sponsor.

Pause & Report

If a partner hides their affiliations or aggressively pushes for your data, stop sharing and notify your security office.
