INSIDER RISKS
IN ONLINE INTERACTIONS

NITAM
National Insider Threat Awareness Month

Cyber-related attacks and social engineering are the biggest threats to a workforce working remotely

Vishing, or Voicemail phishing, is an attempt to defraud people over the phone, enticing them to divulge sensitive information
Users prone to falling for phishing scams are also prone to falling under the influence of disinformation and misinformation campaigns

Foreign intelligence entities and terrorist organizations utilize social networking to recruit insiders and exploit their access

Smishing, or SMS phishing, is an attempt to collect logins or other sensitive information with a malicious text message

COVID-19 has been the source of various phishing scams
