Where we’ve been and where we’re going

Information Assurance
DoD Instruction 8500.01, Para 1(d), adopts the term “cybersecurity” as it is defined in National Security Presidential Directive 54/Homeland Security Presidential Directive 23 to be used throughout the DoD instead of the term “information assurance (IA).”

Cybersecurity Defined
Prevention of damage to, protection of, and restoration of computers, electronic communications systems, electronic communications services, wire communication, and electronic communication, including information contained therein, to ensure its availability, integrity, authentication, confidentiality, and nonrepudiation.
