CDSE *pulse*

LEARN.
PERFORM.
PROTECT.

This month's focus: Industrial Security

Industrial Security professionals play a vital role in protecting national security assets from loss, theft, or compromise. Training, certification, and robust compliance practices lay the foundation for an effective security program and are essential to reducing risk to government and cleared industry, including incidents resulting from facility breaches or cyberattacks.

From safeguarding classified information to managing facilities and personnel, knowledge of industrial security concepts and principles are essential to performing effectively in this security profession. Explore the learning resources available to you through the Center for Development of Security Excellence (CDSE).

Industrial Security Program Annual Planner

CDSE has created a job aid to help you map out your activities for the year and promote security training and awareness. The **Industrial Security Program Annual Planner** outlines 12 months of content areas that comprise the industrial security discipline. Download the planner for your use.

eLearning Courses

- Preparing the DD Form 254 **(IS128.16)**
- Outside Director/Proxy Holder Baseline Training **(IS175.CU)**

NAESOC Webinar

If you missed this webinar, learn about what **National Access Elsewhere Security Oversight Center (NAESOC)** means to you.

More Learning Resources

Posters
Posters are some of the most popular learning aids used by Facility Security Officers. Check out the "Vigilance" and "Security Awareness" posters and put them to use.

Security Awareness Games
Up your game with a security awareness crossword puzzle or Concentrated Jeopardy designed to help you learn and make informed choices. The games are available on this page under "Industrial Security."
